Preface

We are in a predicament to find the middle from the Shariah, a course between enlightenment from Remembrance of God (*Az Zikr*), purification from good deeds; and with actual implementation of Shariah and re-establishment in life.

Qasd (moderation) is in *dunya* (the world) and in *akhira* (the coming world), if, and it is only if, we are regular in righteousness of our faith. We may be seen as too strict, too lenient; too right, too left; too much faith not enough action, or vice versa. Yet those dichotomies are irrelevant.

Anyone can be kind but too we must be constant. We practice what we preach, only then will we be able to pray our five, faithfully, and spread this message of Islam, bearing patience to the trials and tribulations that come on the path. We can only rise above the mess of extremists who don't practice what they preach if we know more about *kufr* (disbelief), *shirk* (association of partners with Allah), *nifaaq* (hypocrisy) etc. and can go above and beyond these to live in Islam in the world. it's living, breathing, forgiving theology; it's real world, reach-out-and-grab jihad; and the very idea of the defiance of extremism.

In defiance of Shiaism, we fight the ideas of *tawassal* (intercession), grave and Saint worship. In defiance of transactional relationships, we challenge the social conventions of open and homosexual relations. In defiance of Ahmeddiyat of the Old and New Testaments of the Bible, we bring our Quranic generation to be a conquering generation to bring unity by fighting division. By fighting Israel's testament, by fighting the sons of Noah. By fighting everything at war with Allah's Beloved Messenger (SWS)'s Qur'an Majeed.

Let us unite as Muslims and challenge Hindus that we are the torch-bearers of the River Indus. Let us unite as Muslims and challenge Christians that we are the flag bearers of the Bible.

We are the followers of all of Allah's Prophets. Peace be upon them all. We must favour Bani Adam not Banu Israel. We are inheritors of the testament of Israel, the testament of Moses, the testament of Jesus; but to understand the redeemed Adam,

we must know, practise (ie follow) and learn from our Holy Prophet (SWS) in the dunya: Rasulallah (SWS) ie Muhammadur Rasulallah (SWS).

If we are at war, dua is the weapon of the believer. Ad Dua Islah al Momin. We have already learnt to love our neighbour and enemy. Now we must all return to learn to practise to love God Almighty.

Introduction

In my opinion, the human race has been made a victim of megamurder, not flood nor famine nor drought of themselves but rather a war has been waged against us. We are victims of gigamurder. We have been lied to. In the name of economics. We will have to establish Gigaeconomics, because by struggling in the fight against extinction will we be able to turn Pakistan, India and China into Gigapowers and Gigaforces.

We need for no astropowers, astroforces and astroeconomics. Only hunger and thirst which need satiation as famine and an evil existent in Yemen, Africa and Palestine, India but not all over the world. Prophet Noah's (Peace be upon him) people suffered flood, ice age extinction etc. but we Nabi Karim's (sall allahu alaihi wasalam) Ummah had never nor will we go extinct from famine.

Nevertheless our millions lost are martyrs to our economic system as these stomach ailments or indirect effects of lack of food and water. Calling these holocausts as just being burnt to death is martyrdom in Shariah. Even if a plague such as black plague it would be martyrdom too. Blood money is owed.

As generation X we have parented the alpha generation or generation Alpha (named after Hazrat Umar al Farooq radhi Allahu anhu) – a generation or cohort where all countries are Muslim, practising Muslim barring Australia and Brazil. Last century there were fifteen/ twenty Muslim countries created, by 2050, who knows, maybe fifty to add to the sixty something already in the world. Inshallah hul Aziz.

Visions

Malaysia 2020 - "Wawasan"

Dr Mahatir Mohammad led a party in Malaysia and in 1991 the plans were made to become an industrialised state by 2020. This would bring national self-sufficiency and was intended to be created through 7% GDP growth, which was achieved.

KSA 2030 - "Rauwya"

Like China's 2030 roadmap, which aims to make China a rich country through a fifteen year plan; Saudia Arabia is already quite a rich country and can become at least accepted as not only having some rich people running the country but having rich people therefore being a rich country.

Rawya translates as a good dream or vision of the future, and reminds us of the boon of knowing the life we are to live.

Pakistan 2047 – "At 100"

With the World Bank plan, we hope too to become an Upper Middle Income country. According to Goldman Sachs by 2075, we may replace Britain as a top ten world economy, inshallah, and be the sixth largest economy in the world.

IMF 2050 – Projections and planning

The types of country can be classed according to *population* as opposed to GDP output or personal income. The world is taking a formation for the global rule of justice, for self and other in the world.

Khilafat

Succession to Allah's last Messenger (SWS) is not only Khalafat ar Rasul, ar Rashidun etc but also exists today; in the here and now, for all of us and everyone who will come.

The Golden Age of Islam

The defeat and disgrace of the world powers is bound to result in our golden age. Muslims have to look inside and find the courage to face the bitter opponents of this world, on and off the battlefield. Now the world is facing a choice between choosing for the good of the Muslims, practising Muslims and Muslim-friendly;

or for evil itself. Our blessed Messenger (SWS) carried the burden of this Ummah on himself. When he worried of those of us (his brothers and sisters) who follow him after him, he would weep until the earth was wet). We must learn from the Seerah Taiba how to progress as a civilisation.

The international community has the wrong foreign policy against the human race. Many, particularly American and British; inspite of being practising Muslim countries, are Nazi or Fascist.

The Muslim armies will have to rise up against “Asian” gigaforces (need for diyat) and create gigapowers (strong countries). Mega-armies only will be able to fight against the attack on Islam and indeed Muslims. The divisive effects of America and its so called allies is being witnessed across the planet’s every continent, even at the Poles, which witness atom bombs dropped in the Middle East on a daily basis.

In monotheism, within the science of theology, the most divisive trinity is an object of severe contempt across the globe, Americans boast of. It is the very addition and interpolation of the Bible. Both the land of the Old Testament prophets, (Iraq), and the New Testament’s, (Palestine); are no longer nation states, and neither are they allowed, either that respect, nor their territorial sovereignty, by the fact that America and its system of allies have turned them into wars and occupations. The same can be said of my blessed country, Pakistan, Af-pak is the war by which is meant the terms of Afghanisan and/or Pakistan.

Freedom for Britain

It is no longer question as to what intent we are free as British people being Muslim, but rather to what purpose we are given, in name, this freedom. Indeed, the present British Monarchy rules over around 20 to 30 islands across the globe which together constitute the British dominion, now, Muslim Britain.

Unsurprisingly, of the top 60 economies of the world by GDP per capita these are all present. There is Britain and there is the world.

Should a Muslim rule over it, such as Prince Charles and specifically, Lady Diana's progeny would do, had they not perished in trying to; this Islamic kingdom would match Turks, who are including East Turkistan, China; Turkistan and Turkey. It will too match Pakistan, including the former East Pakistan and this is the one force which is noticable in an Islamically-practising Britain: Pakistani Muslims.

Who are Pakistani Muslims?

Britons are usually mosque-going, and may I add, Mosque-centred. This means it is not- as being church-centred was, an alternative to being centred on; the spouse, the family, money, work, possessions, pleasure, friends; rather, being a mosque-going people scientifically, according to Islamic sociology means the mosque-centred person is including; spouse, family, money, work, possessions, pleasure and friends within this same paradigm of being Mosque-going and mosque centred.

If the church-going legacy from the historical church-centred peoples of Britain; who were once grounded in interaction of social, economic and political elements of religious life, and creed, worship and ritual, remain unusual; it is simply because of the highly interactive elements of Aqeeda (Islamic faith/ creed) Ibadah (the worship of no God but Allah Almighty), ritual and cultural habits, Iqtisad (Islamic economic striving), siyasat, khilafat being the Islamic political system, and social factors in Islam. These make Islam the practicable religion of Britons over the past of it being Christianity.

If it weren't for Saudi Arabia, not only would the peoples’ labour forces’-worth in biblical lands have suffered military extinction at the hands of USA, but the Holy Quran peoples’ labour forces too would have been made militarily extinct by USSR, USA; as the giga-power of Pakistan is part of US Af-Pak war, an object and victim of the mega war. Iran, for example, being a Shiah country has little to do with this.

If UK and perhaps other Northern and European countries are still facing the threat of religious extinction, now that their religion is less practised in these

countries than Islam; Iraq and Bilad as Shaam: Palestine, Syria, etc, where the Bible was revealed in history are both victims of USA military extinction of the respected peoples. So it is quite clear why UK, USA, France and Germany are now facing an extinction. It is because they are militarily tied up in the wars of Iraq, Syria and Af-Pak.

Nevertheless, the revolution of Iran in the late 70s is not the only historical revolution against USA. Anti-American Revolutions, took place in South America late last century and in Asia, etc. In Cuba in the 50's. The Cuban revolution was an example of the rise of smaller countries against the large empire, nation-building of powerful outsiders. The removal of the US stooge Shah of Iran, and replacement with religious rule through Imam Khomeini, as well as a Cuban coup whence Fidel Castro came to power, show how Anti-American forms of power are relevant within our Muslim world and outside of us too.

If today the US only have an arms race to perpetuate their decaying legacy. Britain, Europe and the rest of the world would rather wash their hands of the evil influence of abject capitalism. Thus it is that their loss of the space race etc to Muslims is pertinent to other nation states.

1. OUR SOCIOLOGY

Although India and China have high labour force per populous; Middle Eastern, Muslim countries have low labour force percentage. Until these (our) countries stand up and defend the labour force and grow in population, we will always need to work harder to build up economic services, security forces and popularity in terms of their contribution over there or outside. It is better lead a counter-attack than attack our own people. This is seen as glorifying terror but if the encroachment on terror is Christianised it is far worse an evil. A double-fold or hypocritical evil. This is why there is a liberation scholarship. To deny the oaths of the hypocrites. Doctors, dentists, our “boys” in foreign wars, states-people, politicians, newsreaders, teachers, weather-forecasters and bankers; many are evil.

At the present time the human index of national economic spread is falling as inequality lessens. Albeit a quantitative measure without the advantages of qualitative analyses, it tells us how Tawhidic paradigm or Sharia paradigm is better than Temptationist ones where resource scarcity is confused for resource allocation. Such qualitative models as index, reveal the surplus of the many giga-economies to be better for the world economy and the lessening of human economic inequality. This Islamic approach is based on Shariah and can be best described as a multi-linear model which fits the multipolar world of today and tomorrow. The old singular model is abandoned soon, God-willing. Thus the deadweight is relegated behind the living, breathing giga-forces, may Allah forgive us all. This integrated development index brings all countries brings all countries to account and compares their power-spread over time. Towards the beginning calculation of Gini co-efficient, calculations for last century, 2000 IMF GDP (PPP) give us a first period then a second from 2023, from two years ago. This gives us a before and after picture. 1.75% turns to 1.46% (Standard deviation of global economy, country by country)[1].

Hypocritical Christians are the minority of Britons

Outside of the Muslim world, the pre-industrial times or given an ambitious appellation, the pre-Islamic world or the pre-Islamic times of the non-Muslim world, should rightly be termed the world’s dark ages or the dark ages of the modern world. Imbeciles like Napolean, homosexuals like Nelson and tramps

1 The human Gini tells us of a lessening of income inequality for the human race as a whole

such as Tolstoy purveyed anarchy to a world empty of Allah's Mercy. These and their minions are uniquely unhappy with our world. Indeed they are at war with the human condition and are in fact, playing happy families.

Today we are living in Londonistan. It is not ruled by George II, nor Elizabeth II nor Charles III but it is called the Little Pakistan, the little country. It is divided by the English. They are not happy with the express idea of the people of the little nation to live as we see fit to live, Christian or Muslim. They are utterly determined to divide our country and we will not let them. We will adhere to the rules of Islam and are content with the appellation of Muslim, even though we believe in the government and they try to bring us into their law; politically, socially and economically. Hypocritical Christians are the minority of Britons (White British are 40-something % [2]) so, why? Their religion, Church of England is created by our social laws and jurisprudence, specifically the ruling of consent to marriage (divorces and polygamy of Henry VIII). The economic system is created directly by Muslim India, the steam engine of the industrial revolution as per significant remittance to Britain. The industrial revolution may not be the macroeconomic system but remains a microeconomic model. Their politics is from the evil of the world.

The Gigapower of Pakistan on the other hand is founded on sacrifice, the fear of God and devotedness to the cause. It is for this much bigger country for mankind to work that much harder. This is our intention, this is what we all should do. For coloured slaves the ends of the African cause justifies the means of colonisation; for Judaism, the ends of the holocaust justifies the means of Zionism; and for India, the ends of British or non-Muslim rule justifies the ends of Hindu extremism. But we shall have nothing of it! Dar al Islam must fight against Christianity, Judaism and Hindutva; free Africa, free Kashmir, free Palestine!

If a person is to gauge the number of people in a country in a region of the world, we would simply total up the population. From the population it is possible, if we want to gauge the number of people of a certain religion, for example, in the respected country; to calculate the number of that particular religion in the country. It may be we take an occurrence rate within the region and multiply by the population to arrive at the religion's population in the respected country.

2 46.5% Christians against 6.5% Muslims whence weekly and daily religious observance is of the Islamic faith.

From here it is possible to calculate two things, primarily: Firstly, how many people of the religion of the country practice weekly. This is calculated by multiplying the rate by which the religion observes weekly prayer by the number of the people of that particular religion in the country.

Secondly, how many people of the religion of the country practice or pray daily. This is calculated by taking the rate by which the people of the respected religion observe daily prayer and multiplying by the number of people of that particular religion in the country.

With Islam and Muslim; as we pray daily on average (once daily); this fourth figure is the same as the second figure as below, which is the rate of prevalence of Islam in the population of the country:

1. Population of a country (UK is non-Christian)

2. Prevalence of a religion (eg. The Islamic faith in UK)

3. Practice of the faith (Islam is more popular in UK)

4. Daily observance (Muslims are more popular in UK)

Without digressing towards political effect of this transition, suffice to say on my part; the average Muslim and the average Briton are the same person whereas it used to be a Christian who were the standard, because we have transformed churchgoers into a Mosque-going nation.

Jihad and wars

The desire of respected countries of the world to fight one another is founded in the principle of self-defence of nations. By this is meant a nation state will defend itself from attack and fight back when it is itself attacked by an aggressor nation state. If this redeems the countries who fight one another with armies, it also creates an implicit amnesty for those who don't or who aren't fighting.

The idea is that the respected countries of the world will not fight with one another at all. The only condition in which there will be a war is if and when one country will be attacked first by another, and this is reason for the defending of land through war. Tacitly, this means war can only arise if a country is attacked first by another, and then there is a counter attack, defense or war, from that point.

However, the initial starting point of war can loosely be termed as arising from outside aggression, which is itself due to miscommunication or misunderstanding.

When we study international politics, we see there are such things as World Wars, space or Star Wars and global wars. However, the victor of these wars is the aggressor, and there is no logic behind UK or USA going to war in our planet in such a way.

Nevertheless, the question arises as to why, such as UK and USA started and finished the wars as named: world, star and global wars; further permanent, perpetual or Cold Wars, even religious or holy wars? Another question which similarly arises is, exactly how have these countries, being seen as the international community or a part thereof, done so?

The clue is not in the world or the space or the globe as such. It is an unseen force where we see the wars under the umbrella of terror, or terrorism, since the era of war is initiated by misanthropy in some outside belligerent parties' communication or understanding. It can reasonably be ratiocinated that terror, as opposed to war, has been created from nothing to cause the reaction of war from which it has spread. This power spread is the cause and creator of an effect with no causation, an end with no means, and can clearly be halted by ending the why of war and the how of war. Given others have said war is caused by extremism or terrorism, and I have considered it here, I will see fit to merely differentiate in this instance; that if we can let it slide, the reasons we have war in this world are forgiven and forgotten, and we then focus on how we have war, it's legality or otherwise, and the jurisprudence of it: whereas the why of war is from our economic metaphor, famine, the how of war is from a religious perspective, jihad in the cause of Allah.

In other words, whereas, it is easy for us to say famine is not congruent with jihad as such. Jihad can be furthering or a better consequence than famine in a country. This gives us the means to the end, the cause to the effect, the self to the world, the respected people of our globe; and thus we find ameliorated the untimely wars, and such wars as the Cold War, religious wars, are given a way to go from no knowledge what to do and of what is happening, into a knowing and wise fighting spirit.

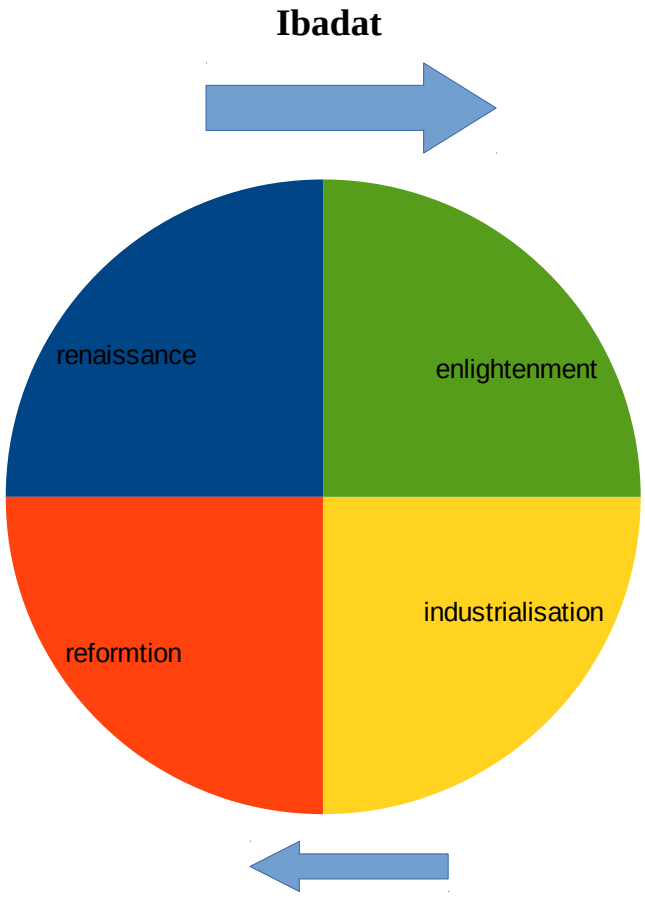
At face value, famine is not dealt with by jihad, but nevertheless, making jihad can go some way towards amelioration or alleviation of the effects of the conditions of famine, such as political disunity, social turmoil, class war and racial division. This apparent contradiction is something we witness in Muslim countries' history, as well as in the current affairs of respecting Muslim Ummah nation states, where jihad does not cause famine, famine creates jihad.

The reason for this circular situation is not only because foreign powers have instigated famine or war, but rather if we let the past situation be forgiven; because of the disparity of our past and our present in terms of our economic development.

Briefly, in the past, when famine was unavoidable, there were no jihads that would have been created. We dealt with famines as nation states of the Prophet sallAllahu alaihi sallam. Now, in our present, we have an era of jihad but not as much famine in our world.

True. If we had a united Khilafa, the religion of Islam would spread and assuming the famine is absent, Jihad would spread Islam around the world. Also true, Turkiye, is proof of the fact that there is neither famine nor jihad. Further truth is that there is less famine and more Jihad thanks to the modern secular state. But nevertheless, Islam can survive and we can fight. If the world is to avoid famines, Islam is the only way. If the world is to avoid mass casualties of war, Islam is the only way.

2. TRANSITION AND REPLACEMENT



Without *ibadaat* such as *Salah, Zakah* and *Sawm*; Europe as a whole and the West in general stagnated after the the first Muslim Golden Age (Islam's first four hundred years).

Since the noble religion of Islam came to the world and dominated every sphere of religion, arts, science and trade; Europe was either in the dark ages of it's own opinion or by others' opinion, the renaissance, the reformation, the enlightenment or industrialisation attempted to take them out of this but landed them back to the same problem they had in the beginning.

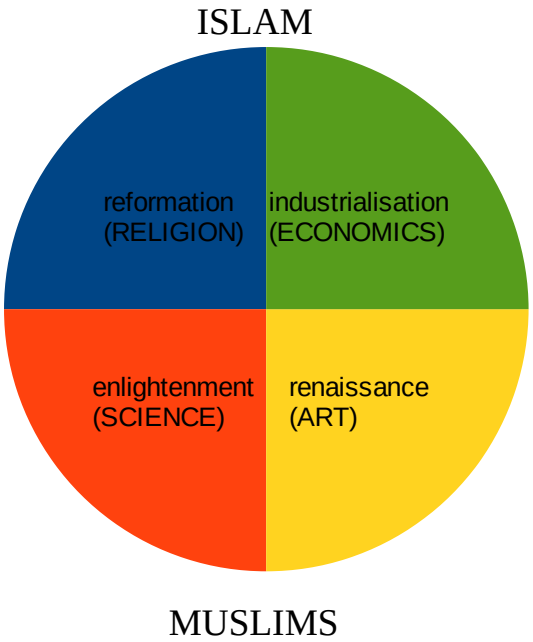
Red murder and blue murder, the sayings and doings of Europeans and Americans has meant wars across the world, the globe and the planet.

However Muslims are now numbering in millions and billions and as God-fearing, mosque-going societies are replacing the old firm.

The fact is America is a morbidly obese country and other people don't like it when it is said but it is a fact. It is because they are overdeveloped through theft and pillage of others.

Their history is a history of the revolution but the revolution is of stone, diet, money or metal (arms manufacturing). Religion is reason for revolution and so is rationality but in this case not vice versa. Religion can't be created by reason nor least of all rationalism.

Similarly war is terror upon terror but for others. The illusion that the terror was upon us and upon the world simultaneously. Both contradictions. Tools, agriculture, idols and wars, even capitalism and the evil of the arms race are evil. We need to find replacement of the isms with Islam: Submission to Allah. Our economics will follow after this.

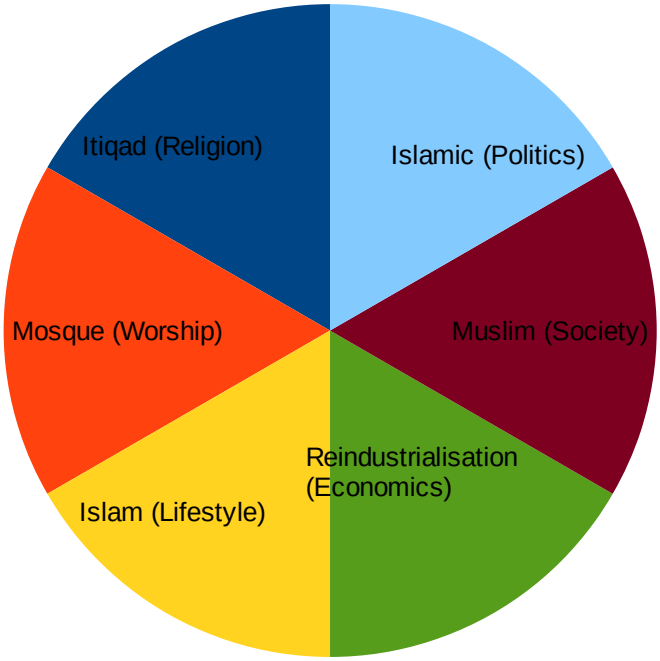


Islam: The Internal Dimension

It is a simple matter of turning things on their side and of simplifying them. This is in the spirit of Quietism, no more war.

The Religion of Al Islam

First, communities require people to make a transition towards holiness and piety. Then it is not a matter of blending in with other religions rather of replacing them so we need roots, we need our history on our side too.



Muslims: The External Dimension

The Replacement of other religions with Islam

Secondly, the world will see a rise of Muslims everywhere. Not just in our society but above this in our God-consciousness. Once resources have swung towards us and transference has occurred we as Muslims will be able to see the extinction of White British Christian and the replacement with Islam. This spells the liberation of USA too.

Turning the clock back on Europe

First we will populate the *Dar al Ahd* and then we return Islam everywhere. Mentally we need to be Muslims in our religion. Then when we bring as well as

Islam, our religion, our message; comparative religion, extensionism, Muslim anarchism and the external dimension we will see change.

This is because of the precedence over language of Judaic philology and the value of our behaviour first being a precedent then being a second nature.

The fact is Anglo-Saxons are from Scandinavia and Europe's mainland as per Angles and Saxons. However despite Norway and Sweden being more observant of religion of Islam as per daily observance, in fact, they call us immigrants as opposed to emigrants. This means permanent settlers.

However this is not a good thing being a permanent Briton as opposed to a temporary when we comprise or compose the country's religion in this sense (praxis and observance etc). It makes us think of everything as destroyed, all that was once permanent is now temporary.

Indeed the threat of extinction is one of self-holocaust they have put upon themselves. It is Anglo- Saxonism's bastard child, Anglo- Americanism which is not only a Holocaust by Jews as opposed to on Jews but the religion which still believes Jesus went to hell has created a holocaust in those who say he ascended, one after the other. Nay even forced themselves to Holocaust themselves.

3. GRANDFATHER AFFECT

Examples of Muslim fatherly figures in Europe and the West:

Sports:

Muhammad Ali (USA)
Mo Farah (UK)
Mo Salah (Egypt and Liverpool)

Statesmen:

Alija Izetbegovic (Bosnia)
Sadiq Khan (UK)
Hamza Yusuf (Scotland)

Science:

Dr Maurice Bucaille (France)

Art:

Shuhada Sadaqat Aka Sinead O'Connor (Ireland)
Sami Yusuf (UK)

Michaeel, Jermaine (Abdul Malik) and Janet Jackson (USA)

Religion:

Dr Zakir Naik (Malaysia)

Industry:

Shahid Malik (USA)
Mohammad Al Fayed (UK)

Architecture:

Zaha Hadid (UK)

The alignment of archaic unconsciousness and First Cause arguments are typically matched, with neopsychism and the Ontological or else Cosmological ones. Without this pattern, the external world (matching the learning curve with theological argumentation) and the Taqwa (Fear of God) of other people and oneself isn't so easily reconciled.

Nevertheless, without clear ontology to know God Almighty a confusion is all too easily made: that the subject as opposed to the object is to be addressed or revered. Inspite of this weakness, it is possible to map out our selves, our relatives and to draw extension into our knowing theology and any number of arguments for the existence of God. Glorified and Exalted be His Mention.
Combinations of Superegoic, male/female, grand and actual parental figures' psyches are to create variations of different permutations of theoretical theology.

Thus created the web of transactions of these following dichotomies:

Male/ female
Parent/ child
Grandparent/ child
Grandparent/ parent
Id/ ego

These variants become as follows:

Male child: female child
Male id: female id
Male parent: female child
Male parent: male child
Female parent: male child
Female parent: female child
Female child (or neutral): female child

Female child (or neutral): female id
Male grandparent: male parent
Female grandparent: male parent
Male grandparent: female parent
Female grandparent: female parent
Male grandparent: male child
Female grandparent: male child
Male grandparent: female child
Female grandparent: female child or neutral

These 16 variants or webs can then be extended too, to include the largely repressed neopsychological ego or the sexuality; which is like an external object in the world which is captured by the apperture of a camera and mirrors the shape of the internal one. If these (third apperture or blind spot effects) are discounted and going off at a tangent is ruled out; it is then possible to assign characters to the web of variations in the human being's genealogy.

The genealogies of these webs can be gauged easily in reverse of their order, so; for example:-

1. Grandmother girl: Isa ibn Maryam
2. Grandfather girl: Nabi Karim (SWS)
3. Grandmother boy: Musa ibn Imran (AS)
4. Grandfather boy: Saam ibn Nuuh (AS)
5. Grandfather girl: Ibn Adam (AS)
6. Grandmother father: Wali Allah (HA)
7. Grandfather mother: Nabi Ibrahim (AS)
8. Grandfather father: Nabi Yusuf (AS)

The first two are grand-daughters, the second two are grandsons and then parents; in the 16 it is in reverse: parents, grandsons and daughters. At a glance this shows us why people may trust others' non-salience; sexually, with respect to gestation and so on and so forth. Put simply, it is because of an overlap between a person's

genome and the genealogy. Other dichotomies such as Oedipal: narcissism are too present.

Life of the main Prophets (PBUT)

Prophet	Muhammad (SWS)	Jesus	Moses	Abraham
Period	570-632	1-33	1400 Bc	1700Bc
Age	63	33	120	175

When we study the life of God Almighty's last Messenger (SWS), we find little monetary inheritance to only one surviving girl child, Hazrat Fatima (RA).

Whereas when we see the flow of genome and the holiness of his (SWS) genealogy, perhaps in relation to the children of Fatima (RA), more emerges.

The Grandfather Affect is a term to describe this. Grandfather Affect means that his (SWS) genome is superlative of even his (SWS) most esteemed genealogy, which is detailed here. This genealogical line will read first with Nabi Karim (SWS), and end with Adam (AS) as the father of humanity.

AD 570 – Prophet Muhammad (SWS)

AD 545 – Abdullah

AD 497 – Abd al-Muttalib (Shaybah)

AD 464 – Hashim (Amr)

AD 439 – Abd Manaf (Al-Mugheerah)

AD 406 – Qusayy (Zayd)

AD 373 – Kilab (Hakeem)

AD 340 – Murrah

AD 307 – Ka'b

AD 274 – Lu'ayy

AD 241 – Ghalib

AD 208 – Fihr

AD 175 – Malik

AD 142 – An-Nadr (Quraysh)

AD 109 – Kinanah (Kinana Tribe)

AD 76 – Khuzaymah

AD 43 – Mudrikah ('Amer)

AD 10 – Al-Yas

23 BC – Mudar

56 BC – Nizar

89 BC – Ma'add

122 BC – Adnan

Ibrahim (Abraham)

Azar(Terah)

Nahur

Sharugh

Ra'u

Shalikh

'Aabir (Eber) (Hud)

Arfakhshadh

Sam (Shem)

Nuh (Noah)

Lamik

Mutu Shalakh

Idris (Enoch)

Yarid

Mahla'il

Qinan

Anush

Sheeth (Seth)

Adam

4. ISLAM IN ISRAEL

How would Islam come into Israel?

Islam is already the dominant practised religion of Israel and Palestine given as like in London countries, USA and UK; 4 as opposed to 3 million practice Islam as opposed to the next best faith, as of 2025.

“*When Jesus, son of Mary, said, "O Children of Israel, I am God's messenger to you, confirming what came before me of the Torah, and bringing news of a messenger to come after me whose name is Ahmad." Yet when he brought them the clear proofs, they said, "This is clear magic."*”

The Holy Qu’ran 61:6

Events from the Life of Prophet Muhammad (SWS) in Judaism

1. The Zoharic Gates of Wisdom

The fiftieth of fifty gates of wisdom as per the Zohar, indeed the fifty gates of wisdom per se, are much like a measure of how Prophet Mohammad (SWS) ascended into heaven, by his age and so on.

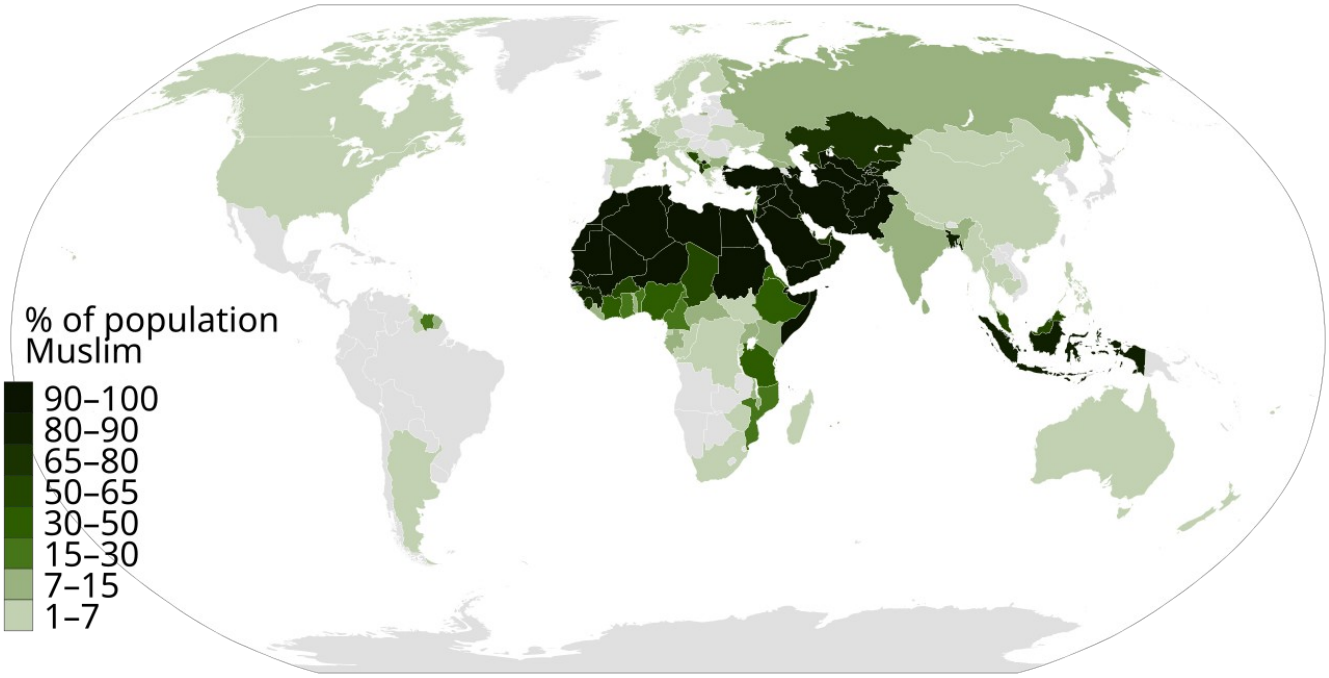
2. Hebrew and Aramaic alphabets (see appendix 3)

The 22 letters of both the alphabet and zodiac are, the years of revelation of the Holy Quran.

3. Life of Holy Prophet (SWS)

If the two are added and ten deducted, from the Sefirot (see appendix 4); the age of the Prophet Mohammad (SWS) is calculated in solar years. This also is migration to Medina until 10 AH (Hijra).

5. ISLAM IN THE REST OF THE WORLD



It is unfortunate that whereas in the rest of the world mega-mosques such as in UK are in the headlines spreading Islam forward as the practising religion if not the most popular religion whereas in USA as in Israel (also Occupied Palestine-the world's largest open air prison); it will now spread through megaprisons.

If we draw graphically, religion of the UK, for example; Muslim, Catholic and Protestant pictorially as regards adherents in places of worship, Muslims are foremost. Thus red, blue and green; subjective and objective, would arise: the same may soon be true of Israel (See Appendix 1 and 2), except with Jews and Muslims (given 4 to 5 million Muslims practice Islam against only 3 million Jews if we include Palestine).

Muslim Britons

IN UK POPULATION: 7%
In Dar al Hakumat: 15%

In prisons: 18%
In detention camps: Up to 50%
In full-time employment: 51 to 71 in general population
Professionally qualified: 16 to 30 in general population
In schools: 8%
In colleges: 10%
In universities:11%
Births: 10%
Marriages: 45 to 33 in the general population
Covid: 23%
Places of worship: 50% / 5 to 5 in general poplation

6. THE GENERATION ALPHA

To give birth to Alpha, a new Muslim generation (Generation Alpha) is the work not of just a father and mother, but of a grandfathers and mothers, and great grandfathers etc. this is because of the war of terror spanning generations of the Shayateen, especially USA and Israel but also UK, France and so on.

Nevertheless after generation X, Y, Z and Millennials, the Generation Alpha is born. Now there are no powers which aren't either Islamic by Dar al Islam jurisprudence or aren't Muslim-friendly: practising Islam more than other faiths (but yet to be Dar al Islam).

For example, China and India are partly Dar al Islam because of historical Muslim rule. Europe is partly Muslim as per the Spanish-speaking world was and so is now too. UK, USA and Israel are practising Islam more than other faiths and so, though yet to become Dar al Islam, are Muslim-friendly nevertheless.

This Generation Alpha is also the fourth generation of immigrants since X,Y, Z generations. Technically, Traditionalists and Baby Boomers, X and Y, Millennials and Gen- Z's, and now Alpha- a Muslim generation.

So as well as being Tadaruk (reparation) for terrible war crimes, the liberation of the rest of the world from the Dar al Islam of Israel (ie Palestine and Occupied Palestine) is as a natural consequence of mass immigration.

What is the Grandfather Effect? It is our new Holy Book, Al Qur'an:

"But once the Sacred Months have passed, kill the polytheists ˹who violated their treaties˺ wherever you find them, capture them, besiege them, and lie in wait for them on every way. But if they repent, perform prayers, and pay alms-tax, then set them free. Indeed, Allah is All-Forgiving, Most Merciful."

-The Verse of the Sword, The Holy Qur'aan (9:5)

These days Jews and Jew-friendly people are working against Islam and Muslims by labelling us as anti-Semite. However when we study the broad Muslim peoples' respected cultures, be we Assyrian, Babylonian, Canaanite, Phoenician; by origin, we are all Semite peoples. Even Egyptians, for example are descendants of Saam ibn Nuuh (AS).

If Jews claim we are not his descendants it is because they are not within the bounds of being his descendants. In fact they are acting like anti-Semites against us. Further, this religious problem of Jews and Christians largely, is a clear linguistic problem.

They are against Semitic languages that Arabs and Muslims speak. This is racism and can be termed reverse racism. I would call it Native Selection because not only are Jews and Christians biological racists but they base their superiority on this. For example the belief in the trinitarianist godhead.

Whereas some people say Jews and Christians are xenophobes and nepotists, respectively; I would accuse them of racism. Indeed a religious racism. This is the problem of religions being conjugated in this way.

Arab, Islamic and Muslim-friendly nations of the world unite and take over. Death to the economic world war and to a new world energy system.

7. THE GRANDFATHER EFFECT

Faith and Reason

Even in the UK, it is Islam which defines tradition and modernity, faith and nationalism. One day in USA too, soon; Islam will provide balance of this top-down Islamic conquest:- through Viziers, administrators, military leaders (pragmatism) and bottom-up Islamisation through mosques, Sufi centres and Quran seminaries or houses (religion).

Islam in Europe today cannot defy the Albanian experiment blending faith and modernity, such as the Christian poet, Pashko Vasa mentions in his poem, “Oh Albania, Poor Albania” (1878). “Wake, Albanian, from your slumber, Let us, brothers, swear in common, Do not look to church or mosque, The Albanian’s faith is Albanianism.”.

Whereas today’s religion wants to be one which grows in the heart of the common man first and then reaches the ruling class, the contradiction between secular democracy and nationalism is not really resolved if the UK or USA become a place of religious conquest where Islamic practices are adopted by the ruling armies, political classes and rich peoples and by the regular people only afterwards.

Instead a balance of the balance is required where both religion grows as does religious conquest. In other words, Islam grows from within and from outside continuously. Religion hand in hand with immigration can continue to overcome totalitarianism and nationalism (socialism etc) and thus what may seem Islamic and anti-capitalist separately is actually a dual-pronged development.

Europe has already seen re-establishment of mosques, public worship, and post-communist Islam rise in Albania, for example in the last few decades. In the rest of Europe and Americas Islam may now establish itself in the common faith in regular people we see outmanoeuvring Christians’ attendance. This is the defeat of materialism and also has a military or class development where government oversees local customs and so on.

This is where around half of a country's people are Muslim, half are harmonically Muslim (ie. behave in harmony and compatibility) and also half are incompatibility- minded as regards Islam.

It is much like a person of dynamic intelligence (or analytical intelligence), practical intelligence or creative intelligence. The new European Muslim is all about balance. Either dynamic and analytical or alternatively pragmatic or creative is the form.

In a Europe or America where week-by-week religious practice and praxis is Islamic and Muslims are continually the week-to-week adherents of faith as per congregants; the House of Islam is synonymous with the whole world just as in Islamisation majority becomes synonymous and eponymous with Islam.

If today the average Briton is a Mosquegoer and we Brits are now living a mosque -centred life and we are unconsciously; and the USA is too in two decades, then surely it is want for the Briton of Britains to come here as much as the Britain of Britons. "Immigrants", as much as converts or reverts who will bring the religious harmony, compatability and majority through balance and maturity.

This triple-pronged, balance of balances can be seen whence the alternative, the legacy and memory of Christendom is replaced by Islam, and Muslims are infiltrating public spaces as well as creating institutions for governance in the world meaning that Islam, governments and the world are growing altogether.

What we are witnessing is a resolution as opposed to dissolution whence through defence of humanity and defensive war (jihad), an arsenal and armaments are built up to create a pitting of issues of race and nation with issues of race, religion and nation with Islam, government and the world, and Islam is winning.

The Visionary Dream of a New Pakistan in London

Today modern life in our towns and cities is changing. The very make-up of our inner city in London is black or brown. If Bradford has *Madrasas* which are by class sometimes 95% Muslims or 90% Muslims attendance-wise and isn't colloquially referred to as a Bradfordistan then it is surely a proof that not only is the "Zonar posh" of yesteryear fled the world as we know it but that it is with

good reason that his world ended! The UK is a Muslim country and, guess what, America is coming to Islam soon!

We have not proved London to be ruled by us, nor yet is it or will it be Londonistan in that sense of governments and what not: but our people are filling up state institutions and such (eg. the NHS), football industry and culture (such as Muslims in the England football team), places of worship (such as Mosques numbering a fifth of Church of England churches) and informing policies (such as recognising Palestine).

We shall no longer be expected to be slaves but rather masters such as Quaid e Azam rahmatullahi alaih. Slavery only ends when we are recompensed by our produce, the West. If today I forward the agenda of freedom from Slavery then I am also a bondsman of the "Great Leader". The first suicide missionary.

If Islam means freedom from unconscionable Slavery then it is through our peoples' jihad. Islam means giga-connectivity (*tasleem*) if we understand internet spread or penetration in the right way. The fact of indentured slavery is that it is or at least was a religious phenomena, part of the Crusade against Islam and Muslims. To kill us and send us to hell the Antechristian created one of the many strands of gigamurder.

Whereas Crusades represent their terror in murdering non-Christians, Slavery is in my eyes, their economic extremism as they try to justify the dependency of a fabled "son" to God Almighty. The excessive wars of Western peoples known to Holy Lands and the rest as "Crusades" further the Imperial cause. For example, Slavery is economic in terms of a justification. Further imperialism and wars are not just extremism but we relate are terrorism eg. famines. The irreligiousity relates:

- within one country, and in many others (world or global)
- increases over time
- a civil form eventually
- self-justifying (neo-imperial and colonial)

Gigamurder is not specific to the Continents of the Planet Earth nor anything of the supposed creed of Christianity at all. Rather I would see the assault of India as on our civil government, on China on Dar al Islam (our majority), on Africa as economic and on Americas as unconscionable yet not specifically against us with respect to natives there.

However looking at Christians denying imperial and colonial gigamurder only worsens the extremism in Slavery and terrorism in the present wars against us. If Slavery was ended when Asians encouraged African Jihads and economic revival, then without a doubt the colonial extremism (Slavery) and terror (Nation-building or building America) can too only be ended when people of our Sub-continent pursue our decoloniality into true resistance within the Gigaforces.

Pakistanis and Indians are seldom mentioned in relation to the multipolar economics that emerges as instead people focus more on China and Tiger economies and so on and so forth. I believe this national and personal wealth modelling; indeed all GDP models can be replaced by measuring number of people first and foremost and from here addressing domestic productivity growth.

The Slavery triangle of America, Europe and Africa, can explain how the Transatlantic slaves were rapine of Europe from Africa but built America. However where historians and history comments Europeans stopped their justification of continuing to transport slaves from Africa to America claiming an ethical reason (perhaps that slaves were needed to found the country and make links not to sustain it all the way), this ethics must have been visible in Asia as Asians had little role in this. Indeed if African Jihad overpowered America or European advances the moral basis was largely Asian.

The freedom of Europe and America from the choke of Christianity is tied to the freedom from Slavery Islam taught throughout the world (ie Jihad) and was absorbed in Europe and America ethical Islamic guidance, an overseeing eye from a brother religion. If Europe and America have all but managed to free themselves from the yoke of Christianity it is because Muslims are fighting Jihad in our hearts, in others' hearts, in our lands and in other lands.

Let it be known the first Pakistani was a suicide attacker, the Quaid was on his death-bed when he created our country. His sister didn't know how far his tuberculosis had developed. Critically, neither did Nehru. Neither did Gandhi Ji. Neither did Mountbatten. When *din* and *jamhouriat* mean the same thing, the people would have no choice but to make the country find Khilafah.

As the seamless integration of the religion of Pakistanis, Muslims; Al Islam into Europe, onto the Turko-iberian people of European continent, is through prayerfulness as much as indigenous prayer in World War One at present in Islam and by 2050 as much as in World War Two in the Islamic faith.

Interestingly enough, the Muslim population of UK is now the size of church congregations in World War One times and will be the size of church congregations in World War Two by 2050 Inshallah, as Muslim populace rises from being half a percent of a billion to being 2% of a billion, (whilst Christianity goes the other way). We Muslims don't reach a half of the country, and it is the decline in Christian numbers that mean our conquest over Great Britain is remarkable, as well as inevitable.

A metaphor of war in Europe is pertinent as it is Christianity's turn for extinction. After all, they engineered the Holocaust for themselves. Actually, it is USA ruled by a Holocauster, and indeed, it is the act and fact of Islam conquering Europe which is germane. Indeed how apposite that those who defended the Holocaust should be suffering themselves. The appeasement of the Christian question is the future of Europe, and is only likely due to the temperance of the Jewish question in the Middle East. In fact, none of the so called patriarchs of Judaism are non-Muslims in the Holy Quran, and there is no Jewish lineage for the progeny Hazrat Yusuf alaihi salam who was never bequeathed a named tribe of Israel. Not only are the patriarchs non-Jews, but they were Muslim. So we are great-grandfathers, grandfathers, fathers and so on and so forth over them.

8. NUCLEAR NON-PROLIFERATION

It cannot be denied that in the world wars, both sides (eg. France and Russia), allies and (eg. Germany and Austria-Hungary), central powers; each suffered a megamurder by the others. In terms of military assault this occurs in both world wars. Basically, Germany and Russia both suffer again.

However what these and other wars are famous for is famine and megafamine such as holocausts. With the exception of the Mongol sack of Baghdad by Christian generals, only American forces have monopolised military megamurder. It has been a consistent facet of USA's policy and polity against other smaller nations. So has nuclear war been a monopoly of "America".

The war of terror is like the use of a profanity to justify the continuation of wars against smaller, poorer countries. However the accusation of giga-murder against USA proves that the government there is responsible for wars that are taking the millions of innocent lives needlessly from the world's peoples' respected countries. Given the fog of war created by the American media it has been difficult to identify either the people or the government as ideologically or sytematically megamurdering however now that the Pentagon is officially the department of war, the President elect can be portrayed justifiably as the position of megamurderer.

Sanctioning or banning nuclear weapons means a non-proliferation treaty can be signed whereby it is claimed signatories have free nuclear power but cannot use it where non-signatories can.

India never signed and being formed in 1947, by 1971 were megamurdering, megaraping and dividing Pakistan, the neighbour of Pakistan.

9. OCCUPATION

Contradiction and Control

The contradiction between democracy and monarchy ie. Jamhouriat and Malukiat, is furthered in UK as per between Deen-e-Jamhour (the prevalent faith) and the powers that be (king and country). The lack of elected officials over the House of Commons ie. non-elected power of House of Lords, only adds to this corruption.

Countries without corruption and contradiction are taking over from within and outside in the rest of the world too ie countries without unelected officials. Within this battle of monarcho-anarchism against democracy, religion and praxis of the masses as opposed to the classes; is the war of monotheism versus monism.

The Ethics of the Ethno-State

Britain, for sure cannot be an ethno-state. In empire, in our dominion and now in the time of our common wealth; we forced civil statehood upon this world's respected peoples- in every continent, without exception. However this tells us why Britain mustn't be an ethno-state. It is not that we never were, nor that we aren't; these are irrelevant to our story and our history. The real reason why Britain can't become an ethno-state is that it doesn't have a singular ethnicity indigenous to these Islands. Neither do we have a common faith.

At the time of reformation, centuries ago; historians note, Britons numbered three million approximately. Christianity could be remembered as a megareligion. At it's height, Church attendance may have been as much as twenty million during world war two. Today Muslims look forward to enumerating ourselves by the Crore (ten millions), to two maybe three crores in a couple of decades time, inshallah; happily to the void of the ruling faith. The loss, we are told being because our ethnic identity, White British Christian is minoritising; is a counter-intuitive, racist and ethnically divisive point of view.

Briefly, Britain will be more like a Muslim state than a white, Christian or American or for that matter a Catholic country. I look forward to that day coming sooner rather than later.

The facts of history are that Britain may have been an ethno-state, one based on white supremacy before (as opposed to principles of nationhood) but now it is taking a turn to change for the better.

Indeed the religion or faith of Islam has changed Britain for the better. Like most of the rest of Europe, Britain is now a proper country. Millions of lives are now being saved from monsters such as ruled these parts of the world yet would rape other parts of the globe.

Racism is still rife in Britain but it is not defined as white racism. It is defined as the extremis of the Jew (Zionism) or Christian (right-wing). The country is no longer a meshing of culture with the political model, ethnicity within the country of state becoming a proper country but rather it is being, belonging and becoming a Muslim country through our behaviour.

We are not joining Europe. We are joining the Muslim Ummah. In the end decades of the last century, Britain was entering the common market, Berlin was divided and later united. Britain doesn't want to be a Stasi-State with a Goebbels' propaganda, a Goering's secret police, a Himmler's SS and an Adolf Hitler. Britain indeed Europe as a whole needs the Carthiginian general Hannibal as did Rome. She needs Osman I as did parts of Europe and the rest of the world. She needs a Zia Ul Haq.

If Britain as a country serves to forward the clandestine reality of ethnicity of the state over this nation's religion, Islam, then it should be invaded by a general from Africa, it should be the beginning of a new Muslim empire and it should do better at ridding itself of false leaders.

Nation State(Ethnic group) Country -Single ethical boundary

Culture is seen by many as the bridge between language and society, for few it is religion but it shouldn't be ethnicity. This concept of groups of people with shared language and history defining our ethics and politics unquestionably defies any idea of discussion and debate but more than that even, has no moral compass.

Why can't Britain be an ethno-state? Because we emerged victorious in the Twentieth century wars? Nothing could be further from the truth. The real reason Britain is no ethno-state is we don't recognise our own ethnicity. We do not recognise our own religion. Britain is a Muslim country. By right of practising Islam as our faith over others, largely Muslim Britons too, fail to accept the hand of Muslim countries.

Seljuks → Pakistan → Muslim India

We wonder why racism and right-wing extremism or even terror has come into our people but the real question is not a too great a Jihad but Jadal not tanattu (scholarly hardiment). It is, put briefly: How dare our people, for example work as self-employed, when our peoples are presently being murdered by the million or billion? Truth be told our only reactionary militancy against the wars on Muslims was from Islamic State.

Today Palestine shows how all human beings can do for the Bible is destroy it's land. The engine fuelling reindustrialisation is not reverse immigration. It is the religion of Islam rising in the world. In Pakistan is the connection of the Seljuks and the Delhi Sultanate creating from Muslim India, a superpower again. What with ISIS in the world we are not just proto-history and history. We are proto-modernity and modernity itself, ourselves. Our pacifism, our world peace, the perfect antibody to today's racism and so on.

Wabasta Alaat (The Web)

The effect of the web on Islam is immense. The spread of our faith from it's globalising and universalising use of data even information has led to an

uncovering of previously suppressed Islamic wisdoms. For Muslims, *Wabasta alaat* (the “web”) is a means of economic liberation for a people who were:

1. Economically denigrated
2. Suffering from economic exploitation
3. Dependent economies
4. Victims of the economic order of the world.

Only we can benefit from the internet, because:

1. The system of reproduction hasn’t been destroyed as in others
2. The biological system is ethically preserved in Islam

Islam has seen a shift into Europe, mainstream religion and culture; and current affairs and politics, even into common consciousness.

Zaheen Alaat (Smart Technology)

The solution of our Ummah discovering electronically-powered miracle economics and then facing the pro’s and con’s of the same for ourselves is that albeit *Zaheen alaat* are a sign that Islam will do relatively, far better than non-Ummah countries from the e-revolution. The reasons for this are largely clandestine.

Given the war crises and the civil war crises after these, it is a cryptic understanding that world, star and global wars were won by Islam and Muslims. The nature of the chthonic advantage as it plays itself out in the world is that as Islam rises with new technology, we do so much more than the warbent or warmonger does.

Ilm and the Sayarakaar

The economics of the information processing tools is a separate thing to, and an important and necessary thing to understand. To consider it from data processing

tools, something that we use such as a computer in our homes, when we sit, when we go out from our homes, wherever it is; telephones, we can say is today's smart technology. In English we call it a data processor, but we will extend this into being an information processor.

We can start to do this given we have giga-forces and we have giga-powers in the future, like China has at the moment, and it will be accepted of us; by the world, the globe, that we have this strength, this power, because, as I said in my previous books, when God Almighty created the first man, bless him, his wife, his children, for being a Prophet, God Almighty gave his sons and his daughters, both of them, his progenies, greens, fruits, vegetables, meat.

Today, when we think of data and information processors and the difference between them; it is simply that there's a tool, and may God save us from the temptation that we would fall into from this, from the evil that we fall into from this. We start off without any tools, and we find stones, bronze, iron metals and as the tools we used being children of Adam (as) it's necessary to say that the tools we use as people allow us to use the world and to understand with intellect and rational thinking that we do process data. But if we give due credence to this function of the computer, we will reignite and resurrect the omnivore and all of these ages.

This sort of thing, as well as what we see in the present day, where we've come and where we're going; travellers, travelling vehicles on the earth, throughout the globe, other planets, spaceships, space shuttles (aeronautical travel) and this thing will take this generation very far.

Whereas in the beginning, we had a means into this conceptualisation in greens, fruit, vegetables, water, milk, drinks, fish, poultry, meat; these I would consider a means only to make food. First we came from heaven to the earth, and then in the end, we'll go from earth to heaven. First we came, we stayed, we were on our way

and we go. These four stages stay in mind for historians, anthropologists, sociologists, psychologists, economists, everyone and to see this

10. SCALING UP

The rising of the religion of Islam is neither through anarchism or into the Judeo-Christian societies but rather through reindustrialisation in global tirades across the largely now Muslim world. As economic and political growth is heralding new scalar powers in economies which are both absolutely superior and relatively superior to so-called European and American economies, more progress yields from Africa and Asia than the former developed world.

These are gigapowers, megapowers and otherwise macro-economies of Anglo-Americans through providing a complete overhaul of definitions of economic progress and sustenance. Redistributive economic models such as reallocate resources in nature towards the nourishment as of Islamic models are forwarding countries and propelling the human race into the Asian Century with no more human loss of the last century.

We are facing the fact that military war is a loss of human life or for human life. The world is quickly becoming a synonym for war and suffering. The globe as our human planet is demarcated by our second nature in this respect. Nevertheless we must stand to recognise we have little to lose by refinding that the Russian or Muslim soviet including Rous and Kazakhstan was first to space; that India and China, both partly Muslim lands are our world's largest economies and countries, and that not only has the Muslim world successfully defended the Holy lands from the usurping West but that the so-called world wars, holocaust and the forming of the UN etc was an inherently racist and Islamophobic misadventure.

The argument for this is not only the fact that the notion of the country is devoid of the civility of an Islamic state but rather that the exercise of nation-building or civil war, as it should be phrased; as well as the instance of the incidence of comity of the post-war institutions had taken place without Pakistan, India and China etc. on the map.

Geography to scale

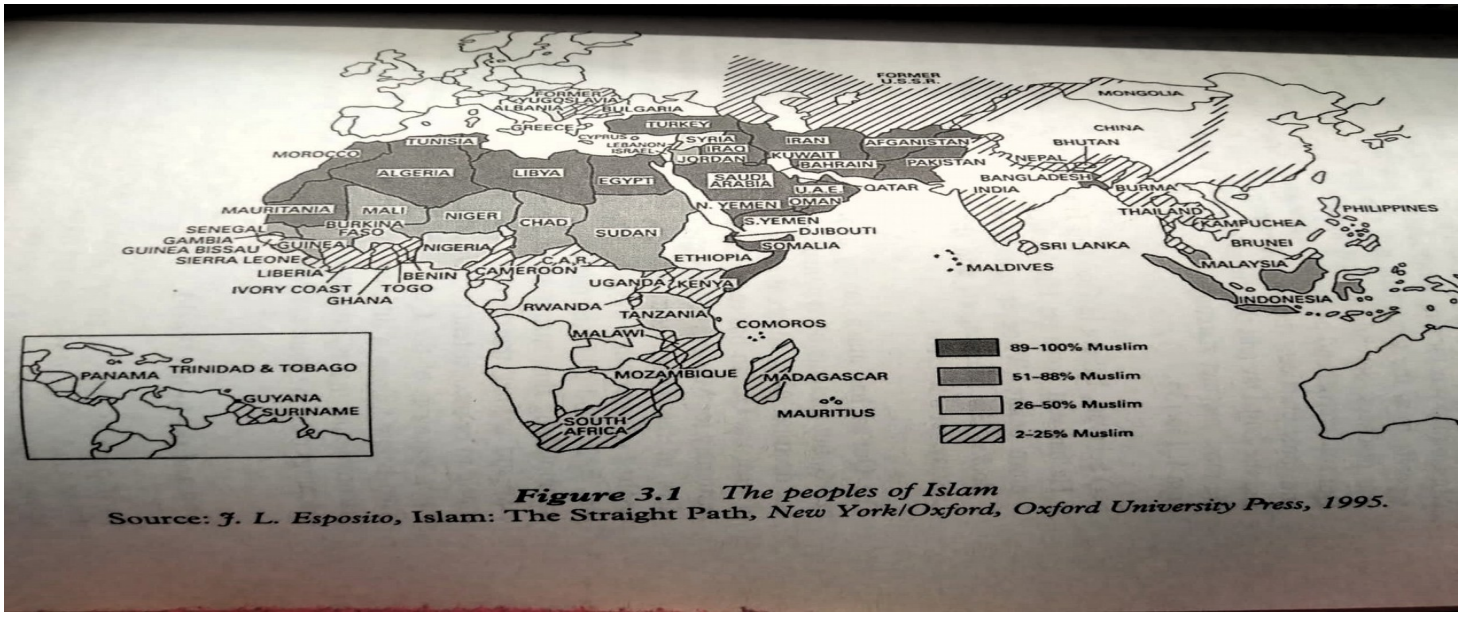


Figure 3.1 *The peoples of Islam*
Source: *J. L. Esposito*, Islam: The Straight Path, *New York/Oxford, Oxford University Press, 1995.*

The Peoples of Islam revised:

The peoples of Islam can grow now to include the Americas fully

11. THE END

In UK, approximately 1.2 million people pray on a Friday afternoon as compares a similar number in Christian churches across England, Scotland, Wales and Ireland.

Given Muslim peoples are around 5 million in UK and pray on average once daily, rounding up, a Crore are praying Islamically and that is a percent of a billion people. Christians on the other hand are murdering our billions of people throughout this planet and are noted for this only.

Indeed given they are some thousand only, dividing a billions by a thousand gives a million making the present Christians mega-murderers.

Men of understanding have to begin to battle to control thought and the dissonance between contradiction and control.

It is no matter of progress from playing victim card to no longer doing as ceasing to do so is a basic human response and it is an obligation and a responsibility on a personal and private level.

The Fog of War

The moderation of the noble nations of the past, through balanced diets, enlightened religiosity and mixed economies, etc., has given rise to the concept of enlightened moderation, but also of peaceful globalisation.

What we need to be connoisseurs of is the fog of war or the wars against us in some circles, which we may or may not be a part of at this time, because the global war on terror has just ended and everyone is looking for an explanation for what just happened. If we look at the human population at the end of the nineteen twenties we see the beginning of the Russian revolution taking place and reaching a fruition. We see the rise of Adolf Hitler. We see it is of 20 Crore Muslims (of 200 Crore human beings) and what have we done by making that many people extinct? As members of the countries of USA, UK, Israel; they are countries,

some unborn at that time. They are the Satanic forces of the world who are against the majority of Islam in these parts of the world.

It is worth saying they have made the majority of the human species extinct. They are a different species altogether. What good can be expected from capitalists, imperialists and colonialists?

They have no right to sit on these Islands in Britain and constantly tell us what to do throughout our world. They have no right to sit in America and war hundreds of wars against the peoples of the world. They have no right to claim Palestine as their own as Jews. It is high time we took a stand against the real fascists, the real nazis and the real extremists and terrorists. We see people are being starved. The Muslim population of the inter-war period is twenty Crore. In the decades or century after or so following they have already killed off this many millions.

It is not right, the attitude of murdering willy nilly and making genocide everywhere. When they say they label Bosnian, Sudanese, Pakistani, Afghani, Iraqi or other Muslim countries' organisations as extremist or even terrorist, we've got to realise that is the beginning of them making us extinct because that is all they want. Money, and that is what we deserve, the blood-money.

It is no longer a question of pre-, inter- nor post-war crimes against humanity and reparations thereof, rather the Khilafat of these times (ie the respected peoples of the respected countries of the world) to stand up.

The fundamental problem of the world today and it has been addressed before and it is being dealt with, indeed it has faced a huge blow; is the incendiary notion of economics whereby materialists assert their Marxism. As a final riposte to this so-called economics or materialism or the system is the Muslim defeating of USA in it's many wars against humanity.

USA declared five wars of it's hundreds of interventions:

1. Britain
2. Mexico

3. Spain
4. The World

Cultures which were growing towards Islam or had nourished through Islam, external cultures and internal cultures to US where indeed the world at large was made the enemy. USA's 400 wars (quarter in Muslim countries or Arab region) can then be split accordingly. Not 18th, 19th, 20th and 21st century, nor Islamophobic and non-Islamophobic nor internal, external; whole world vs part of the world but rather by the very nations they antinomise:

1. Dar al Islam – by declaring war on Spain
2. Pre- USA- by declaring war on Britain
3. Ante- USA - by declaring war on Mexico
4. The rest of the world- by declaring world war repeatedly.

These categories correspond perfectly to American cultural racism.

1. War
2. Racism
3. Slavery
4. Extremism and terrorism

The future of the in's and out's of government and non-US government are the global war on Islam, the extremism of the creation of USA, Slavery as a reason for this and terror. War, extremism, slavery and terrorism are the types of American racism.

War → Slavery → extremism → terrorism

This is the process of the fog of war and fobbing off war, where US doesn't believe in peace, defence or anything good but rather in murder, an evil which can only be rooted out by tackling racism economically.

This political explanation of conflicts, that not only are USA a culprit but they are the terrorists as well is because of the reversal of the accusation of terror, war and killing with no reason suffering a multiplier through the fog of war.

If a psychological explanation is given such as the fog of war it is easier to understand. However it is because of this mental disorder that this idea is formulated.

The actual explanation that inside USA and outside, internal to the government of the USA and external to it are the visible signs of war in this world which is actually a form of racism from this raw state to enslave others (ie the African continents black Muslims) to eventually commit to extremism and terrorism, where outside or non-governmental forces war outside USA.

An example of this is COVID. It was spread by American terrorists. This is a proof US citizens are terrorists. Civil wars in non-US countries are proof that Us war has led to it's citizens defining what is and who are terrorists as it is US citizens who are outside of the government who are the terrorists abroad of USA.

	In USA	Outside USA
US government	SLAVERY	TERROR
US non-governmental	EXTREMISM	WAR

Their government is the initiator if not the perpetrator of this as above.

What is the fog of war? It is where we define war as cause and effect and there is no reason to the killings, so it is without cause and effect, it is thus defined as state terrorism.

Whereas Slavery created the economic USA, extremism is where they keep foreigners in foreign jails and maintain evil immigration policies. Terror is the military interventions and war is the rest of the problem. , such as other countries'

civil wars or US-driven foreign wars abroad of USA. USA creates wars not just their government but their people.

Who were the wars of interventions against?

1. Slavery- Africa (directly) and Europe (indirectly)
2. Extremism -USA, Mexico, Spain, UK
3. Terror – Islam pitted against itself in military interventions
4. War – Muslim countries attacked illegitimately.

World war, for example, USA is the terrorist pitting Muslin against Muslim in a series of interventions which should be identified as wars, illegitimate wars, undeclared wars. The critical difference twain East and West, vital to the air of religion in the countries of the world; is not that the West is rich nor that the East, spiritual rather that the disconnect of the diktat of self and world suffered in the West is the sole reason for so-called World War.

If it is that US and Europe are the terrorists for hundreds of years now as 2026 is eighty years since Hiroshima and Nagasaki were bombed, it is due not to the fact of the loss of the world, space nor global wars rather to the laying claim to victory in World Wars they prove their insanity and mental illness.

We beat the Angrez at the space race by sending Uri Gagarin to space as one of a country of ten of nineteen , being Muslim. We beat slavery in Africa through jihad and made USA what it is today by establishing segregation. Through freedom of conscience we will liberate even the majority of bourgeois democracies through the Christian era into the faith of the religion of all of Allah’s Prophets (PBUT), Deen-e-Islam. As Din-e-Islam is now becoming eponymous with din-e-jamhour, we Muslims will overcome the terror label or social construct and create harmony and love for the faith of Islam to surmount the modern world, countries capable of defending themselves against the attack of others, making the security situation within their birders resolve by their own accord.

Look at Walandezi people in history. Erstwhile Walendezi people were enslaving Africa such as South Africa. Today Amsterdam is liberated from causing tyranny in our world. Today 17% of Dutch capital, Amsterdam, are Muslim, ie. 140,000 of the residents of the Dutch capital are practising Islam. National statistics show a lower percentage attend church every month and perform prayer than the number of Muslims (taken as a rough estimate for daily observance).

Indeed if USA, UK, France, Germany, Canada, Australia, New Zealand etc are to some extent, in part or whole, to fall to Islam we might expect US forces first to be kicked out of Europe first, and then. If bourgeois democracies do become ruled by Muslims it is only to be expected that Scandinavian, Western and Eastern European countries may well fall to Islam first and then the larger and further West countries and democracies. Democracy in the non-Muslim states is merely a form of chauvinism whereby Satan the accursed has forced every third party to attempt to make the human race extinct. Indeed the consultation in affairs of government outside of Islam is Satan's parliament, sexualised and racist; devoid of ideals, people of the present age must be invited to Islam through scholarly analogy and everyday example (by Muslims of our nation).

All proponents of state terrorism have one problem in common. Extremism. Nevertheless we speak of extremism of non-Islamic governance or even management and war. Not terror nor terrorism.

Rabi an Noor 1447

Afterword

Islam is the demonstrative religion of London, meaning UK and USA; by virtue of the fact that Christians are no longer in the majority and more people attend mosques than churches and pray daily in the Islamic faith than as Christians. Islam is our faith and ipso facto Christianity is a non-liturgical religion.

In this sense it is irrelevant to us are we in London; ruled by a Muslim, are our neighbour countries Muslim, are we or our neighbours Dar al Islam, are our institutions Islamic or other factors such as determine religiosity such as security, metaphysical, community or ethical considerations. These factors may or may not be answered positively. What is on point is that the man in the street here is Muslim. The Bible is replaced by the Holy Quran, the trinity by our God, Jesus by the Prophet Mohammad (Peace be upon him and his family) and so on and so forth.

Indeed I am not arguing for the inclusion of Britain nor USA into our *Ummah* as of now but rather that it be accepted in London we practice Islam not the non-liturgical faith because we are going to mosques more often than being church-goers.

At the moment Muslim peoples are one to three here on earth, so about 25 % of all people are Muslim. By twenty-five years time this will be one to two Muslims (as over 33 % will be Muslim) and at around 40 something percent, nearing 50 %, one-on-one Muslim to non-Muslim later this century.

When we look at weather a country is determined as following Islam or not there are a few salient factors:

1. Muslim government – Firstly, is it ruled by a Muslim? Does he implement Islam?
2. Islamic bloc member – Are it's neighbour countries' Muslim?
3. Majority Muslim people – Is the land Dar al Islam?
4. Islamic institutions and practice of Islam
5. Other factors that determine religion such as community, metaphysical, ethics and spirituality. Whereas the point before this tells us are countries practising

Islam more than other faiths as per our safety, security and theology (liturgy), this is whether we follow Imams etc and are Muslim-friendly.

If we look at the process in reverse for the Islamisation of Brasil for example, given the country is built from Muslim slaves from Muslim lands:

First, they befriend Islam and Muslims. So another South American Muslim country would have sent an emissary or an ambassador to Brazil or even a person from outside the continent. Second, an Imam would establish *Salah* in Brasil. Third, our theology would penetrate there. Fourth, our people would have our safety and security guaranteed. Fifthly, as the practice of Islam overtakes Christianity, institutions would be created by Muslims. Sixthly, it would become Dar al Islam because the majority of people would be Muslim. Lastly, a ruler would rule by Islam and religion would penetrate from or to neighbour states.

Looking at London broadly, UK and USA; where London has a Muslim Mayor and does have or at least did have a neighbour country Dar al Islam or so in Spain and Portugal (given Muslim rule there) until nine years ago when we left Europe:

Muslims come to populate London in slavery times. Imams were establishing *Salah* in those times. We hear of Muslims in now- USA such as Omar ibn Sayed. They wrote autobiographies and so Islamic theology penetrated partially in London a long time ago if not now. The issue of safety and security is however against us as Britain and America are notorious Islamophobic nations. Inspite of being a practising Muslim nation we lack penetration in governmental or legal institutions and are creating non-governmental institutions largely. Our sense of ethics and community here is lacking. Once we are more numerous than Christians we would then only need to be one-to-one to non-believers to have a Dar al Islam. Only then is a Muslim government possible and it is only likely then. A better foreign policy would follow from here as we find a Muslim bloc.

Peace in our world

The accusation that there are amongst for example Palestinians, terrorists; stands not just with the occupiers of Palestine and those who have assisted them in the genocide or the holocaust, which includes the so-called United states of America's politicians (and it is for good reason that it includes, for example their president or really megamurderer elect), where they have done this.

The odd Musalman has killed a handful of people- it is an issue for police in my opinion eg. 7/7 or any of these so-called tragedies where there has only been a handful of people in any one place being killed (upto forty something) it may seem a lot but Christian terrorists so a lot more than that and if police are used here there is no accusation. it's just the white coloured people went mad, he had a gun and he had a manifesto. Nevertheless the thing is with the labour force extinctions with the armies they have employed against us.

Where they have got a situation if you look at it one-on-one, where they are mathematically a bidding of their police force with our fringe elements. Whereas if you bid their armies with our people's armies it is not right so you have to bid their armies with our peoples. that's where we come up as the mega-religion in this country eg. Us army including reserves have armed personnel of millions of people. It is incumbent for us to go in there. They are terrorists. They are going in and murdering millions of people. By the fact that they murder millions of people and make extinct the labour force of the Holy Lands, a second point emerges. That we have to assert these facts legally and ethically and to veto their religion which is informed by a pseudo-deity and a crypto-deity, the trinity.

Anyone does this. There is no challenge by the Bible that Jesus can't come back. It is possible and probable that it will be one of us from the community of the Holy Lands' countries.

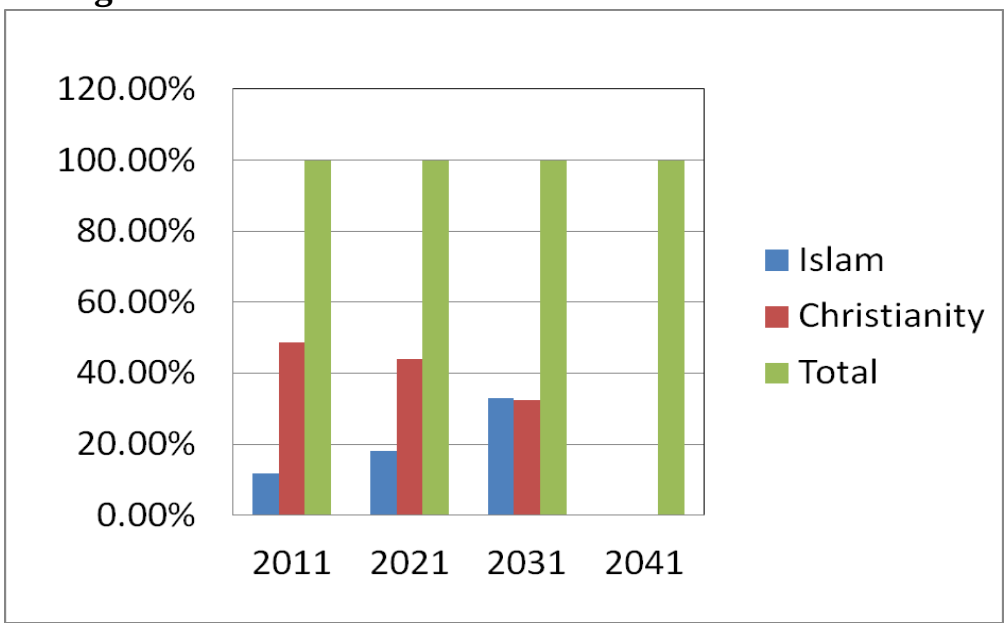
The Arabs, Persians and Romans aren't the only people of the Semites, there were Phoenicians, for example. The Jews and Christians haven't denied us the rule of the Holy Lands for many decades now. If you look at a bloc of Muslim countries and why it would work better than just one country, why a larger country would

work better than smaller ones and why so even if only econnomically; the example is here now.

We see China working as greater and economically superior, vetoing these armies even though it is just stood there, even though it is not doing anything and is not fighting back. It is not necessarilly that the country has a greater army, the Peoples' Army but because you would have to admit therefore, there is no possibility of a giga-extinction or of megawar against the respected countries of the world. We have to take that role and we have to see it through before we take a role in a Muslim bloc as such informed by Pakistan and Saudia Arabia saying an attack on one is an attack on the other.

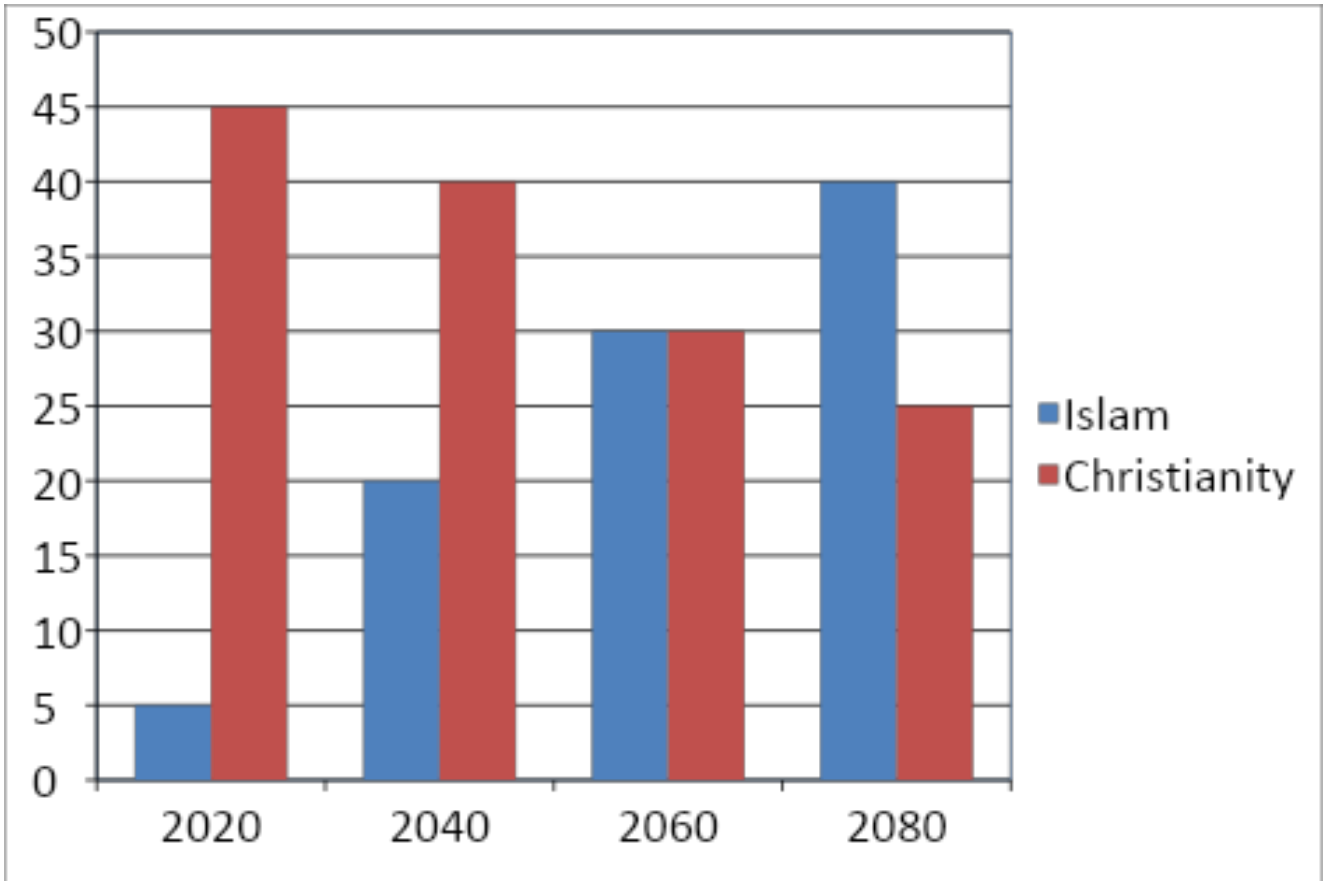
Appendix

1. Religious Affiliation in London



Muslims are greater than Christians in the capital city for the coming census

2. Religious practice

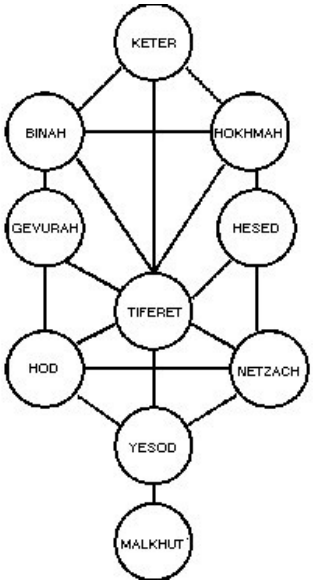


The possibility of overtaking of Islam over all religions in America (Muslim congregants are shown in millions against Christian)

3. Quranic Age of Revelation

The Holy Quran was revealed over 22 years in total.

4. Medinan Age of Revelation



The Hijrah of the Holy Prophet (SWS) and the years of Medinan Revelation were 10 years in total.

5. HASHIA E SHMARINDA

Address bar- PATA

The address bar is at the top of your web browser (such as Internet Explorer or Google Chrome). It's where the address of a webpage (or URL) appears. You can type a web address straight into the address bar typing into the address bar will take you to a website.

Android- ISAIBEROIYD

The software that some phones and tablets use to function. It's a type of 'operating system'. Phones and tablets from lots of different brands are Android devices – including Alcatel, Google, HTC, LG, Moto, Samsung and Sony.

Anti-virus – TAHAFAZ E BURA DASTA

Software that detects and prevents known computer viruses from attacking your device.

Apps (applications)- ALAMAT

A type of computer program that you can download for your computer, tablet, or smartphone. There are thousands of different apps available for lots of different things – from playing games and puzzles, to online shopping and banking. You download apps from the Google Play Store if you have an Android phone or tablet, or the App Store if you have an Apple device.

Attachment - MUNSALIKAH

Files, such as photos, documents or programs, which are sent along with an email.

Bandwidth – TAQWIAT E BAYANAH

The amount of data that can be transferred through your internet connection. If your bandwidth is low, it could mean that webpages load slowly, or you might struggle to watch videos online without waiting for them to load.

Browser- NOBAT WAGHAIRA

Cloud storage - BAYANAHSHUD

This allows you to save photos, videos and files to a storage area on the internet, rather than taking up space on your device. Examples of cloud storage include Google Photos, iCloud and Dropbox.

Cookies- BAYANAHBANDI

A cookie is a small piece of data that's stored on your computer, smartphone or tablet when you visit a website. Most websites pop up with a message asking you to 'accept cookies'. Cookies allow the website to track information about your activity on the website, such as how many times you've visited and how long you spent on the website. You don't have to accept cookies, but it might mean that you can't access some websites.

Data allowance – MIQDAR E BAYAANAH

If you aren't connected to Wi-Fi, using the internet on your smartphone or table uses mobile data, which is measured in megabytes (MB) and gigabytes (GB). Most phone and tablet contracts have monthly allowances for data usage. Once you use up your allowance, you might get charged for additional usage, or you might not be able to use mobile data until your allowance renews the next month.

Device - ALA

This is a catch-all term for smartphones, tablets or computers.

Download - MUNSALIKA

To transfer files or data stored on the internet onto your smartphone, tablet or computer. For example, you might download a picture that a friend has sent you over email, download a document to read from a trusted website or download an app from the online app store.

Email – VABASTA KHATUT

Electronic mail, or email, is a free and easy way to stay in touch with family and friends, and the main way that organisations and companies will communicate with you. Popular email providers include Google Mail (commonly known as 'Gmail'), Outlook and Yahoo.

Encrypted – KHAFIA KARDA

If an app or a website is encrypted, this means that all the communication between you and the website is secure and can't be read by anyone else. Encrypted websites have web addresses that start with 'https' – the 's' stands for secure.

Hack – BURA ISTAMAL

An attempt to gain unauthorised access to a computer or account.

Hardware – NOYAT WAGHAIRA

Computer hardware describes the physical parts of a computer, including the screen, mouse and keyboard.

http/https – IZAFI MATAN

Most web addresses start with 'http' or 'https'. It refers to how the information is shared over the internet. Make sure the website you’re using starts with ‘https’ if you’re entering personal or financial details – the ‘s’ stands for secure.

Hyperlink – IZAFI SIRA

Hypertextuality, a link within a normal computerised text through the alaat

Icon - ALAMAT

An image or symbol which represents an app or function on your phone, tablet or computer screen. You usually 'tap' on an icon to open an app.

Inbox - KHUTUT

The virtual folder in your email account where any emails you receive are stored.

Information processing – MALUMATBANDI/ ILMBANDI

Internet – AALAAT E SHMARINDA

LOCAL AREA NETWORK- LAN – WABASTA E MAQAMI ILAQA / MAQAMI ILAQA WABASTA ALAAT

A house, business or community internet served by a router or a connection (Local Area Network)

Link (or Hyperlink OR HANDLE) -RABTA / DASTA

A link can be some text, an image or a button – you can click or tap on it in order to access a website. The link may be blue and underlined, and may include wording such as 'click here for more information' or 'find out more'.

Log in – LATA KAR DENA

If you have set up an online account for anything including email, banking, shopping or social media, you'll need to use a username (often your email address) and password to access the account – this is known as 'logging in'.

Malware – BURI NOBAT

Malware is short for 'malicious software'. A general term describing software that can cause harm to your computer through spreading computer viruses or accessing your personal information.

Memory -TAQWIAT E ALA

Mobile data – BAYANAH E ALA

Mobile data enables your phone to get online when you're not connected to Wi-Fi. It's measured in megabytes (MB) and gigabytes (GB), and there will usually be a limit on the amount of mobile data you can use.

Computer Network – WABASTA ALAAT

Online – WABASTA

This refers to anything using the internet. For example, online shopping or online banking uses a website or an app, rather than doing the activity in person or over the phone.

Phishing – BURA DASTA

An attempt at identity theft in which criminals direct users to a fake website to trick them into disclosing private information, such as usernames or passwords.

Pop-up – BURA ALAMAT

A small window that suddenly appears (or 'pops up') on a webpage, usually an advertisement or an alert.

Profile – ZAATI PATA

A description that may include your personal details and is used to identify you on a social networking website. This can be set as public (viewed by everyone) or private (only viewed by certain people).

Program – LAYAKAAR

A computer program is a catch-all term for something that runs on your computer, tablet or smartphone. Examples include apps on your phone and tablet, video-calling programs like Skype and Zoom, or anti-virus programs. You might also see them described as 'software'.

Router -TAAR

A device that connects your computer, smartphone or tablet to a broadband-enabled telephone line and sends out your home internet signal.

Secure website MAHFUZ SAFHA

A secure website is encrypted, which means that the communication between you and the website is private and can’t be read by anyone else who might be trying to access personal or financial information. These websites have web addresses which start with 'https' – the 's' stands for secure.

Security certificate - TAHAFUZ

This is a piece of information on a website that shows the website is what it claims to be, and that the website is secure. A security certificate is also known as a digital certificate or a Secure Socket Layer (SSL) certificate.

SIM card (SARIF SHANAKHTI NAMONA)

A SIM (Subscriber Identity Module) card is a small card that's inserted into a mobile phone, providing it with its phone number and customer identity. SIM cards connect phones to a particular phone network, such as Vodafone or EE.

Smartphone – ZAHIN ALA

A mobile phone that can connect to the internet as well as make calls and send texts. You can do lots of different things with a smartphone – from sending and receiving emails, reading the news, playing games and puzzles, and banking or shopping online.

Social media – SAMAJI RABTAKAARI

Social media, or social networks, are online communities where you can connect with friends, family and other people who share your interests. Examples include Facebook, Twitter and Instagram.

Software – NOBAT WAGHAIRA

Software is a catch-all term for something that runs on your computer, tablet or smartphone. Examples include apps on your phone and tablet, video-calling programs like Skype and Zoom, or anti-virus programs. You might also see them described as 'programs'.

Spam - BEKAR KHATUT

A commercial email that you didn't request, also known as 'junk mail'.

Spyware – JASUSI MASANAH

An unwanted program that runs on your computer, which can make it slow and unreliable or make you a target for online criminals. Anti-spyware software helps protect your computer against security threats caused by spyware and other unwanted software.

Tabs - DASTA

Tabs sit at the very top of your internet browser. You can click on the '+' symbol to open a new tab, where you can visit a different website without losing access to

the webpage you're currently on. Some apps might also have tabs at or near the top or bottom of the screen, which you can click on to switch between different parts of the app.

Tablet – ALA

A handheld device with a touchscreen that can connect to the internet and be used as a portable computer.

Upload – ITILAT E MUNTAKIL

To transfer files or data stored on your smartphone, tablet or computer to the internet. For example, you might upload a picture to social media or to your cloud storage.

URL -PATA E SAFHAT

The URL is the address of a webpage. You type the URL into the address bar at the top of your web browser (such as Internet Explorer or Google Chrome) to visit a website.

Viruses – BURA DASTA

Programs that spread from one computer to another by email or through malicious websites. They can slow your computer down, display unwanted pop-up messages and even delete files.

WAN – WABASTA E WASIH ILAQA / WASIH ILAQA NIZAM E ALAAT

A network of companies, organisations or the like; intranet or wireless connectivity Eg. The world wide web (Wide Area Network).

Webcam - QAMRA

A video camera that allows other people to see you on video calls, such as Skype or Zoom. Most smartphones, tablets and computers have inbuilt webcams (sometimes simply referred to as 'cameras'), but if you have an older computer you might need to buy a separate webcam.

Webpage – WABASTA SAFHA/ WIRQ E ALAAT

Webpages provide information through text, images and videos, and are displayed on your web browser, such as Internet Explorer or Google Chrome. Websites are made up of hundreds of webpages.

Website- WABASTA SAFHAT/ AWRAQ E ALAAT

A set of related webpages owned by one person or organisation. For example, Age UK's website is made up of hundreds of individual webpages on different topics, but all the webpages begin with 'www.ageuk.org.uk'. You visit websites on your web browser, such as Internet Explorer or Google Chrome.

Wireless network – MARBUT NIZAM E ALAAT

This is also known as 'Wi-Fi' and is a way for your computer to connect to the internet without using wires or cables. You can access public Wi-Fi networks, or arrange a contract with an internet provider who will provide you with the equipment needed to set up your own Wi-Fi network.

****

In today's world where Khilafat and Caliph are profanities and even worse, in this country, where God is too, this situation (Christian or Muslim anarchism) is the result of Christianity and world war.

Inside the soul maps out to the real world differently than it used to whence people understand the evil of some people in some parts of the world. This is us Muslims realising, actualising and factualising our faith, obedience and love and how it relates to the world or to OUR own lives, economically and socially.

We are no longer the slaves that serve American interest. Our religion is a physical socio-cultural and material power. A new primary or universal social habit.

There is a psychic struggle between an economic language internal and external to the human being and the Word of Allah (ie The Holy Qur'an) and how Al Qur'aan is creating the diktat of authority as regards our system of worship through, for example our system of reproduction to our material life.

****
